Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

2. Claims 1-20 are objected to because of the following informalities. Appropriate correction is required.

In claim 1, line 5, the phrase "the other end" should be changed to – an other end

In claim 8, line 3, what is the word "its" referring to?

In claim 11, it appears that this claim should be depended on claim 3 to provide proper antecedent basis for the phrase "said mount portion".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 6,199,429 (Hirosawa).

With regards to claims 1-2, 6-7, 13-14 and 18-20, Hirosawa discloses a vibrating gyroscope comprising, as illustrated in Figures 1-20B, a tuning fork vibrator 1 including a driving electrode 13 and a detecting electrode 17A, 17B; a case 4 for receiving the vibrator; a plurality of terminals 9 which is bent; a resin or laminar structure containing portion 2 containing the case wherein the case is adapted to be supported within the containing portion by the terminal; an IC circuit 6 for processing a signal output. (See, column 4, line 56 to column 7, line 67).

With regards to claims 3-5, 11 and 15-17, Hirosawa further discloses a resin mount portion mounting 31 the case; a case electrode disposed on the case connected to the vibrator; a circuit. (See, column 8, lines 1-44).

With regards to claims 8-10 and 12, Hirosawa suggests a metallic cover 8 having an engagement claw 87, 88 for covering the containing portion. (See, column 8, line 54 to column 10, line 36).

Conclusion

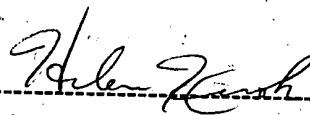

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references cited are related to a sensor within a housing/casing.
